RE: File # 2004-01454, Route 4A, Lebanon

Dear Mr. and Ms. Bellinger:

On August 30, 2006, the New Hampshire Department of Environmental Services, Wetlands Bureau ("DES") inspected property located on Route 4A, Lebanon ("the Property"). The purpose of this inspection was to determine whether the wetland impacted adjacent to Route 4A had been restored pursuant to Letter of Deficiency WET 05-010 ("the LoD") dated May 12, 2005.

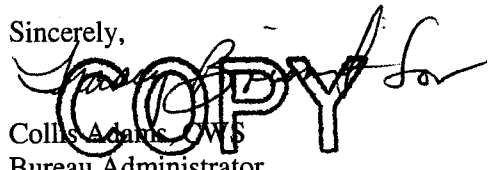

As a result of the inspection, it was determined that the area that was the subject of the LoD is functioning as a wetland and is supporting a dominance of hydrophytic (wetland) vegetation. Therefore, no further action is required of you relative to the Letter of Deficiency and DES will take no further enforcement action at this time. This Notice is being sent to help you avoid similar violations in the future so as to protect wetlands and surface waters from unregulated despoliation before violations occur.

DES personnel may re-inspect the Property at a later date to determine whether full compliance is being maintained with applicable statutes and rules. DES reserves the right to pursue restoration or other enforcement action for any future violations observed during subsequent inspections of the Property.

RSA 482-A, the New Hampshire wetlands law, was enacted to protect and preserve wetlands and surface waters from unregulated despoliation. Prior to dredging, filling, or construction, in and adjacent to surface waters, an individual is required to obtain a permit. If work is done without a permit, this is considered a violation of RSA 482-A.

If you have any questions regarding this matter, please feel free to contact Linda Magoon at (603) 271-4056 or by e-mail at [lmagoon@des.state.nh.us](mailto:lmagoon@des.state.nh.us).

Sincerely,

  
Collis Adams, CWS  
Bureau Administrator  
DES Wetlands Bureau
